THE CITIZENS TAX REFORM MOVE-MENT IN OREGON.

What is taking place in Multnomah county is the last resort to save government by the people from corruption and extravagance when it reaches the The citizens and tax payers—that is men who are both-organize a general committee for the whole county, with an executive committee, and sub-committees to investigate and report on what they find and recommend reforms. The same movement alone will save the other counties of the state from being swallowed in the whirlpool of fraud and maladimistration following an era of speculation and inflation.

Among other duties assigned to the various sub-committees is the following:

The committees on taxation and public expenses was instructed to inquire into the practicability of reducing the taxes of this city under the present assessment to 6 mills on the dollar, instead of 8, and as to the practicability of changing the law under which, 2 mills on the dollar is now collected within the city for road taxes, and to discover whether other cities collect road taxes; also, to inquire into and recommend what expenses can be cut down and what offices can be abolished.

This is exactly in line with what this writer has been recommending. It is against the raids of the taxeater, because those in office will not reform the conditions and protect the people, taxpayer only.

A CITIZEN'S LETTER.

A large Willamette valley farmer expresses himself thus to the editor of the JOURNAL in a letter of recent date:

"I have been watching your paper closely for the name of available and good men for the various state offices to be put forward by the Republicans next spring. I believe if the Republicans act wisely and put up only good and honest men, that they will have no trouble in electing them, but if they put up known political schemes, ready and willing to help in looting the state treasury, I claim the right as an ludependent Republican to try and help defeat any or all of them.

"You suggested some time ago the name of H. R. High Mountains In America.

It may surprise the reader who is a little rusty on geography to be informed that there are over 300 mountains on the North American continent that are over 10,000 feet in height, but such is the case. In Alaska alone there are scores of them, and not less than five in that boreal region exceed 15,000 feet .- St. Louis Re-

Sain's Description of Zola.
